

# Data Protection for the Cloud Era

Data is at the core of the digital transformation, and it fuels every aspect of business. From mission critical applications to end user productivity, data is growing at an astonishing rate from an increasingly diverse set of applications and devices. Any loss of data puts businesses at risk. It's imperative to protect and manage it.

Druva™ delivers simple, reliable data protection and management to enable every business to accelerate growth and make better informed critical business decisions.

## Who is Druva?

Druva™ delivers a SaaS-based platform to protect and manage enterprise data across endpoint, data center and cloud workloads. Druva Cloud Platform is built on AWS and offered as-a-Service; delivering globally accessible, infinitely scalable and completely autonomous enterprise data resiliency. Customers drive down costs by up to 50 percent by freeing themselves from the burden of unnecessary hardware, capacity planning, and software management. Druva's patented cloud architecture transforms backup data into an asset, making it more open and accessible so customers can streamline governance, improve cyber resiliency, and gain critical insights to uncover opportunities and expedite decision making.

# Druva Cloud Platform

I wanted a data protection solution my team could easily manage from anywhere in the world, and I knew it had to be cloud-based. With the Druva Cloud Platform, I now have a single pane of glass with which to manage our entire backup environment of VMs, endpoints, and Microsoft 365.

**Kevin Pennington**

National Raisin Company
