## Deployment stages

### Discover

Druva's highly skilled experts will review your business requirements, infrastructure, network, and application environment to identify and mitigate challenges prior to production.

### Design

We work in partnership with your technical staff to design an effective and successful deployment plan. Comprehensive approaches are developed for optimal network-bandwidth usage and integration with infrastructure services, as well as data-protection and governance policies to meet your business objectives.

### Deploy

Our solution-deployment experts have provided organizations of all sizes with accelerated business time-to-value through proven methodology, while cutting time-to-completion in half. We will ensure that the implementation and integration with your infrastructure services are designed for effortless deployment. We will also assist your organization through the pilot, UAT and deployment phases by monitoring and mitigating issues throughout the engagement as part of full deployment assistance.

### Solution consulting

Druva's Professional Services team is available to help plan and implement the necessary changes to your Druva solution deployment throughout the infrastructure lifecycle process. We will ensure contingency plans and resources are in place during the change control management process, augmenting your teams and reduced costs using our continuous engagement methodology.

### Training

The [Druva Help portal](#) provides access to documentation and self-paced learning to enable customer success through rapid knowledge transfer. We also provide continuous training opportunities to ensure that new resources are ready to support the solution, without the hassle of revisiting the procurement process. Our subject matter experts can create customized training based on your environment and targeted for appropriate stakeholders in your organization.

## Key benefits

The Druva Professional Services consultant is your dedicated point of contact to address any deployment related queries during the services engagement. Here's how they deliver exceptional value:

- Reduced total cost of ownership through expert-led implementation with proven methodologies
- Accelerated ROI
- Evaluates your requirements
- Design for your deployment
- Full deployment assistance and best practices
- Faster deployment experience and guidance from seasoned technical consultants
