druva

Druva Pricing Plans

Which plan do you need? Unlock the best value at every step of your journey to better data security with straightforward pricing, clear, predictable costs, and no hidden fees. Our flexible plans are designed to grow with your needs, ensuring you get the protection you need without breaking the budget. The following represents the most frequent and common pricing and packaging and does not represent all editions. Of course, enterprise, multi-year, and volume discounts are also available. Contact us if you have additional questions.

License Package Types

By Workload

SaaS Universal License – learn more

One license to **protect all critical SaaS applications and identity workloads**—built for teams managing multi-application environments.

Essential Pack (for SMB) – learn more

Complete data protection for SMB organizations (<250 people) across critical SaaS applications, identity workloads, data center, and cloud-native workloads. One platform. One contract. Zero infrastructure.

Enterprise Data

Data Center

Air-gapped, immutable backups and cyber resilience for server-based workloads on-premises or in the cloud: **VMs, Files, NAS, and Databases.**

Public Cloud

Air-gapped, immutable backups and cyber resilience for public cloud services and applications: **Compute, Storage, Databases, and End-Users.**

Productivity & Analytics Data

Microsoft 365

Data security and compliance of **Exchange Online, OneDrive, SharePoint, Teams, Planner,** and more.

Google Workspace

Data security and compliance for **Gmail, Google Drive, Shared Drive, Docs, Sheets, Slides, Contacts, and Calendar.**

Endpoints

Readily achieve your data security and compliance objectives by monitoring and protecting **end-user data.**

Microsoft Power BI

Data security and compliance for **Microsoft Power BI analytics, dashboards, and business intelligence assets.**

Identity Provider Data

Microsoft Entra ID

Protect critical identity objects/configs plus fast restores to re-enable access while avoiding reintroducing malicious changes.

Microsoft Active Directory

Backup security across domain/forest with surgical restore options or **accelerated forest-level recoveries** after severe compromise.

Okta

Automated backups and **granular, high-fidelity restores** to quickly reinstate trusted access.

CRM Data

Salesforce

Automate backup of **data and metadata**. Simplify testing with automated sandbox seeding and archive data to cut costs.

Microsoft Dynamics 365

Data security and compliance for the **Sales and Customer Service modules** of Dynamics 365.

Enterprise Data

Data Center Workloads

	Business	Enterprise	Elite	
	TB/month after deduplication	TB/month after deduplication	TB/month after deduplication	**Description**
Autonomous Protection for Files, VMs, Databases, and NAS	✓	✓	✓	Air-gapped and immutable backup for files, VMs, databases, and NAS.
Global Data Deduplication	✓	✓	✓	Global, source-based data deduplication.
Flexible, Fast, and Granular Recovery	✓	✓	✓	Zero egress, auto-scaling, and unlimited, granular restores.
DruAI Intelligence Layer and Agentic Workflows	✓	✓	✓	AI-powered intelligence layer using agentic workflows to investigate incidents and deliver insights from backup data.
Managed Data Detection and Response (MDDR)	✓	✓	✓	24/7 backup monitoring for early detection of threats and expert assistance through incident response and recovery.
Intelligent Storage Tiering for Long-Term Retention	✗	✓	✓	Automatic storage tiering for long-term retention (LTR) saves 20%, and a direct-to-cold, archive storage tier saves 50%.
Multiple Storage Regions and Data Lock	✗	✓	✓	Backup to more than one region and enable immutable backups, preventing deletion of recovery points or policy changes by anyone.
Flexible and Fast Local Backup & Instant VM Recovery With Druva TurboTier	✗	✓	✓	Meet stringent RPO and RTO requirements, while leveraging the operational, security, and cost benefits of the Druva Data Security Cloud. Available at no charge to Druva customers. TurboTier can be deployed as a virtual appliance or on bare metal.
Security Center	✗	$	$	Monitor your backup security posture, detect risks, anomalies, and threats to take a proactive defense.
Data Anomaly Detection, Access Events, and Third-Party Integrations	✗	$	$	See and act on data anomalies, unusual activities, or disconnections, and compliance alerts. Amplify your actions with pre-built integrations and APIs.
Quarantine Bay to Prevent Reinfection	✗	$	$	Quarantine suspected or infected data to safeguard your environment when investigating or responding to a security incident using Druva or via third-party integrations.
Curated and Orchestrated Cyber Recovery	✗	$	$	Automatically find clean files across multiple backups for faster response times and reduced data loss. Orchestrate malware scans and data recovery actions. Automate and scale with third-party integrations.
Threat Insights	✗	$	$	Stop threats before they strike with continuous scanning of Threat Watch, then investigate and neutralize attacks instantly using Threat Hunting. Proactively prove recovery with Scheduled Recovery Testing.

druva

Data Center Workloads

	Business	Enterprise	Elite	
Disaster Recovery as a Service (DRaaS)	✕	$ (per VM)	✓	"One-click" VM recovery in the cloud — RPO of an hour / RTO of minutes.
US GovCloud (FedRAMP option)	✕	$	$	Druva GovCloud ensures secure, compliant U.S. gov data protection with AWS GovCloud and full encryption.

Public Cloud (e.g. AWS, Azure)

	Business	Enterprise	Elite	
	TB/month after deduplication	TB/month after deduplication	TB/month after deduplication	**Description**
Autonomous and Agentless Protection	✓	✓	✓	Air-gapped and immutable backup for compute, file, database, and end-user services.
Global Data Deduplication	✓	✓	✓	Global, source-based data deduplication.
Snapshot Orchestration	✓	✓	✓	Automated snapshot orchestration for AWS resources only.
DruAI Intelligence Layer and Agentic Workflows	✓	✓	✓	AI-powered intelligence layer using agentic workflows to investigate incidents and deliver insights from backup data.
Zero Egress / Unlimited Restore(s) / File-Level Recovery	✓	✓	✓	Recover without compromise. Zero egress, auto-scaling for performance, and unlimited restores. Granular and file-level recovery.
Intelligent Storage Tiering for Long-Term Retention	✕	✓	✓	Automatic storage tiering for long-term retention (LTR) saves 20%.
Multiple Storage Regions and Data Lock	✕	✓	✓	Back up to more than one region and enable immutable backups, preventing deletion of recovery points or policy changes by anyone.
Cross Region and Cross Cloud Backup	✕	✓	✓	Back up workloads to a different region or public cloud than the source (for example, AWS EC2 to Azure).
Automated Cloud DR	✕	✓	✓	Failover and failback automation of AWS workloads in a DR region. Use orchestration and runbook automation to test regularly.
Dru AI Copilot for Data Security	✕	✓	✓	Copilots designed to enhance your experience. Dru Assist for customer support and Dru Investigate for cyber threats.
Self-Service Rollback Actions	✕	$	✓	Recover deleted entities from the Druva cloud within a configurable window, mitigating risks from accidental or malicious deletions (Azure VMs, EC2 coming soon).
Curated and Orchestrated Cyber Recovery	✕	$	$	Reduce data loss and recover faster with the same features available for SaaS and Data Center workloads (curated snapshot recovery, automated quarantine, malware scans, and third-party integrations) coming soon.

Public Cloud (e.g. AWS, Azure)

	Business	Enterprise	Elite	
Threat Insights	✕	$	$	Stop threats before they strike with continuous scanning of Threat Watch, then investigate and neutralize attacks instantly using Threat Hunting.
US GovCloud	✕	$	$	Druva GovCloud ensures secure, compliant U.S. gov data protection with AWS GovCloud and full encryption. Available for all backups stored in the customer's AWS account.

$ — Optional capabilities using Security Posture & Observability (Core Security), Accelerated Ransomware Recovery (Adv. Security), and Threat Insights (Prem. Sec) solutions.

Read the Druva Credits Solution Brief to better understand how they provide a flexible and cost-effective model for securing your data.

Productivity Data

Microsoft 365

	Enterprise	Elite	
	per user	per user	**Description**
Autonomous Protection for Microsoft 365	✓	✓	Air-gapped and immutable backup for Microsoft 365, including Teams
Public Folders, PSTs, and Inactive User Retention	✓	✓	Meet data security, compliance, access control, and retention requirements.
DruAI Intelligence Layer and Agentic Workflows	✓	✓	AI-powered intelligence layer using agentic workflows to investigate incidents and deliver insights from backup data.
Managed Data Detection and Response (MDDR)	✓	✓	24/7 backup monitoring for early detection of threats and expert assistance through incident response and recovery.
Federated Search / Legal Hold for eDiscovery / Defensible Deletion	✕	✓	Search for files. metadata, or SHA1 hashes. Support legal hold, data collection, and case review requirements with built-in features and third-party integrations (e.g., Exterro and OpenText).
Ultra-Fast Backup / Recovery for Large Data Volumes (using Druva Microsoft 365 Backup Express)	$	$	Restore Exchange, SharePoint, and OneDrive data in bulk to a previous point in time with rapid speeds of 1 to 3 TB per hour using Druva Microsoft 365 Backup Express.
Security Center	$	$	Monitor your backup security posture, detect risks, anomalies, and threats to take a proactive defense.
Data Anomaly Detection, Access Events, and Third-Party Integrations	$	$	See and act on data anomalies, unusual activities, or disconnections, and compliance alerts. Amplify your actions with pre-built integrations and APIs.
Quarantine Bay to Prevent Reinfection	$	$	Quarantine suspected or infected data to safeguard your environment when investigating or responding to a security incident using Druva or via third-party integrations.
Curated and Orchestrated Cyber Recovery	$	$	Automatically find clean files across multiple backups for faster response times and reduced data loss. Orchestrate malware scans and data recovery actions. Automate and scale with third-party integrations.
Threat Insights	$	$	Stop threats before they strike with continuous scanning of Threat Watch, then investigate and neutralize attacks instantly using Threat Hunting. Proactively prove recovery with Scheduled Recovery Testing.
Sensitive Data Governance	$	$	Pre-built templates to identify, manage, and protect sensitive data, including defensible deletion.
US GovCloud (FedRAMP option)	$	$	Druva GovCloud FedRAMP ensures secure, compliant U.S. gov data protection with AWS GovCloud, FedRAMP Moderate ATO, and full encryption.

$ — Optional capabilities using Security Posture & Observability (Core Security), Accelerated Ransomware Recovery (Adv. Security), and Threat Insights (Prem. Security) solutions.

Google Workspace

	Enterprise	Elite	
	per user	per user	**Description**
Autonomous Protection for Google Workspace	✓	✓	Fully managed, air-gapped, and immutable backup for Google Mail, Calendar, Contacts, Drive, and Shared Drive.
Shared Drive and Inactive User Retention	✓	✓	Meet archive and compliance retention requirements with ease.
DruAI Intelligence Layer and Agentic Workflows	✓	✓	AI-powered intelligence layer using agentic workflows to investigate incidents and deliver insights from backup data.
Managed Data Detection and Response (MDDR)	✓	✓	24/7 backup monitoring for early detection of threats and expert assistance through incident response and recovery.
Federated Search / Legal Hold for eDiscovery / Defensible Deletion	✕	✓	Search for files. metadata, or SHA1 hashes. Support legal hold, data collection, and case review requirements with built-in features and third-party integrations (e.g., Exterro and OpenText).
Security Center	$	$	Monitor your backup security posture, detect risks, anomalies, and threats to take a proactive defense.
Quarantine Bay To Prevent Reinfection	$	$	Quarantine suspected or infected data to safeguard your environment when investigating or responding to a security incident using Druva or via third-party integrations.
Access Events and Third-Party Integrations	$	$	See and act on data anomalies, unusual activities, or disconnections, and compliance alerts. Amplify your actions with pre-built SIEM integrations.
Sensitive Data Governance	$	$	Pre-built templates to identify, manage, and protect sensitive data, including defensible deletion.

druva

Endpoints

	Enterprise	Elite	
	per user	per user	**Description**
Autonomous Protection for Endpoints	✓	✓	Air-gapped and immutable backup for end-user data, including endpoints and M365/Google Workspace.
Offline PSTs and Inactive User Retention	✓	✓	Meet data security, compliance, access control, and retention requirements.
Integrated Mass Deployment for Endpoints	✓	✓	Seamless, integrated mass deployment with automated provisioning, silent installation, and centralized policy management.
DruAI Intelligence Layer and Agentic Workflows	✓	✓	AI-powered intelligence layer using agentic workflows to investigate incidents and deliver insights from backup data.
Managed Data Detection and Response (MDDR)	✓	✓	24/7 backup monitoring for early detection of threats and expert assistance through incident response and recovery.
Federated Search / Legal Hold for eDiscovery / Defensible Deletion	✕	✓	Search for files or SHA1 hashes. Support legal hold, data collection, and case review requirements with built-in features and third-party integrations (e.g., Exterro).
Claude Backup	✓	✓	Protects and secures AI-powered work across Claude Code and Claude Cowork with automated, scheduled backups to Druva's air-gapped cloud.
Security Center	$	$	Monitor your backup security posture, detect risks, anomalies, and threats to take a proactive defense.
Data Anomaly Detection, Access Events, and Third-Party Integrations	$	$	See and act on data anomalies, unusual activities, or disconnections, and compliance alerts. Amplify your actions with pre-built integrations and APIs.
Quarantine Bay to Prevent Reinfection	$	$	Quarantine suspected or infected data to safeguard your environment when investigating or responding to a security incident using Druva or via third-party integrations.
Curated and Orchestrated Cyber Recovery	$	$	Reduce data loss and recover faster with curated snapshot recovery, automated quarantine, malware scans, and third-party integrations.
Sensitive Data Governance	$	$	Pre-built templates to identify, manage, and protect sensitive data, including defensible deletion.
US GovCloud (FedRAMP option)	$	$	Druva GovCloud FedRAMP ensures secure, compliant U.S. Gov data protection with AWS GovCloud, FedRAMP Moderate ATO, and full encryption.

$ — Optional capabilities using Security Posture & Observability (Core Security), Accelerated Ransomware Recovery (Adv. Security), and Threat Insights (Prem. Security) solutions.

Analytics Data

Microsoft Power BI

	Enterprise	
	per user	**Description**
Autonomous Protection for Microsoft Power BI	✓	Fully managed, air-gapped, and immutable backup for Power BI, featuring automated and continuous discovery of resources.
Flexible Backup Scheduling	✓	Configure automated backups with customizable retention policies that dynamically map to current and future resources.
Long-Term Retention of Data for Compliance	✓	Extend data availability to ensure compliance with regulatory requirements.
Fast, Granular Recovery and Download of Power BI Data	✓	Recover workspace assets, including report(s), dashboard(s) and semantic model(s).
Built-in Cloud Key Management or Bring Your Own Key (BYOK)	✓	Robust, enterprise encryption key management built-in with the option to bring your own key (BYOK).

Identity Provider Data

Microsoft Entra ID

	Enterprise	
	per user	**Description**
Autonomous Protection for Microsoft Entra ID	✓	Fully managed, automated protection for Microsoft Entra ID environment and objects (users, groups, roles, devices, apps, etc.).
Air-Gapped & Immutable Backup	✓	Secure, air-gapped, and immutable identity backups protected from ransomware and tampering.
DruAI Intelligence Layer and Agentic Workflows	✓	AI-powered intelligence layer using agentic workflows to deliver insights from backup data.
Unlimited Retention	✓	Retain Entra ID backups as long as needed to support compliance and recovery.
Full Environment Backup & Restore	✓	Capture and restore complete Entra ID system states with minimal disruption.
Granular Search Across Snapshots	✓	Quickly locate specific Entra ID objects across all historical backups.
Granular In-Place Recovery	✓	Restore individual identity objects and relationships directly to their original locations.
Secure Data Export	✓	Securely export identity backup data for audit and compliance needs.
Relationship and Member Mapping	✓	Capture, understand, and rebuild user, group, and role relationships.
Object Comparison	✓	Compare Entra ID objects across snapshots to pinpoint configuration changes

Microsoft Active Directory

	Enterprise	
	per user	**Description**
Autonomous Protection for Microsoft Active Directory	✓	Fully managed, automated protection for your Active Directory environment and its objects (users, devices, domain controllers and more).
Air-Gapped & Immutable Backup	✓	Secure, air-gapped and immutable identity backups protected from ransomware and tampering.
DruAI Intelligence Layer and Agentic Workflows	✓	AI-powered intelligence layer using agentic workflows to deliver insights from backup data.
Unlimited Retention	✓	Retain Active Directory backups as long as needed to support compliance and recovery.
Full Environment and Granular Restore Options	✓	Restore complete Active Directory system states and granular elements to original locations with minimal disruption.
Granular Search Across Snapshots	✓	Quickly locate specific Active Directory objects across all historical backups.
Forest-Level Recovery	✓	Rapidly rebuild entire AD forests with guided recovery workflows.
Relationship & Member Mapping	✓	Capture, understand, and rebuild user-group-role relationships

Okta

	Enterprise	
	per user	**Description**
Autonomous Protection for Okta	✓	Fully managed, automated protection for your Okta environment and objects (users, groups, apps, tenants, workflows, etc.).
Air-Gapped & Immutable Backup	✓	Secure, air-gapped, and immutable identity backups protected from ransomware and tampering.
DruAI Intelligence Layer and Agentic Workflows	✓	AI-powered intelligence layer using agentic workflows to deliver insights from backup data.
Okta Audit Log Backup	✓	Securely retain Okta audit logs for compliance and investigation.
Full and Granular Restore Options	✓	Flexible restore of full instance, users, and apps to original location, sandbox, or alternate production.
Granular Search Across Snapshots	✓	Quickly locate specific Okta objects across all historical backups.
Secure Data Export	✓	Securely export identity backup data for audit and compliance needs.
Relationship & Member Mapping	✓	Capture, understand, and rebuild user, group, and role relationships.
Record Level Comparison	✓	Compare Okta record versions across snapshots to pinpoint configuration changes

druva

CRM Data

Salesforce

	Enterprise	Elite	
	per user	per user	**Description**
Autonomous Protection for Salesforce Data and Metadata	✓	✓	Fully managed, air-gapped, and immutable backup for Salesforce data and metadata
Flexible, Fast, and Granular Recovery of Tables and Metadata	✓	✓	Restore tables and metadata, and easily compare snapshots
Built-in Cloud Key Management or Bring Your Own Key (BYOK)	✓	✓	Robust, enterprise encryption key management built in with the option to bring your own key (BYOK)
Multiple Storage Regions and Long-Term Retention of Data	✗	✓	Choose more than one storage region and data retention beyond 1 year
Data Anonymization	✗	✓	Satisfy compliance and privacy needs with data anonymization.
High Frequency Backup	✗	✓	Minimize data loss by ensuring recent changes to data are frequently captured
GDPR Compliance	✗	✓	Meet GDPR needs with the Subject Access Request (SAR) workflow.
Sandbox Seeding	$	$	Test and experiment without risk to live systems or production data
Data Archiver	$	$	Salesforce Data Archiver moves out stale data from Salesforce active storage to Druva storage.

Microsoft Dynamics 365

	Enterprise	
	per user	**Description**
Autonomous Protection for Dynamics 365 Sales and Customer Service Apps	✓	Fully managed, air-gapped, and immutable backup for D365 CRM Apps including Sales and Customer Service.
Customizable Retention Policies	✓	Extend data availability beyond Microsoft's limits, up to 1 year, to ensure compliance with regulatory requirements.
Flexible, Fast, and Granular Recovery	✓	Restore individual items to production or a sandbox before testing to ensure integrity and prevent reinfection.
Built-in Cloud Key Management or Bring Your Own Key (BYOK)	✓	Robust, enterprise encryption key management built in with the option to bring your own key (BYOK).
Sandbox Recovery	✓	Test data before restoring to production. Populate the sandbox with workflows that minimize errors and maintain relationships.
